

Minoru Nakazawa

Professor
Director, AI Lab.
Chief, Dept. of Information and
Computer Science, College of Engineering
Chief, Graduate Program in Information
and Computer Engineering,
Graduate School of Engineering
Kanazawa Institute of Technology (KIT)
Isihkawa, Japan
nakazawa@infor.kanazawa-it.ac.jp

EDUCATION

Kanazawa Institute of Technology
Nonoichi, Ishikawa, Japan
Doctor of Engineering 1996-1999

Kanazawa Institute of Technology
Nonoichi, Ishikawa, Japan
Master of Engineering 1991-1993

Kanazawa Institute of Technology
Nonoichi, Ishikawa, Japan
B.A. in Engineering 1987 - 1991

WORK

Kanazawa Institute of Technology
Nonoichi, Ishikawa, Japan
July 1996 - present

Director, AI Lab.
Chair, Dept. of Information and
Computer Science, and
Graduate Program in Information
and Computer Engineering.
April 2018 - present

Professor of Information and
Computer Science
AI, Distributed System
April 2011 - present

Associate Professor of Information
and Computer Science
P2P, CDN, QoS for Internet
April 2002 - March 2011

Assistant Professor of Information
and Computer Science
Network Architecture
July 1996- March 2002

Fujitsu Laboratories Ltd.
Micro Operation Systems
April 1993 - June 1996

Awards

IPSJ Outstanding Paper Award
June 2021, Information Processing
Society of Japan. "Examination and
Its Evaluation of Preprocessing
Method of Individual Identification
in EEG"

IPSJ Yamashita SIG Research Award
June 2016, Information Processing
Society of Japan. "Implementation
and its Evaluation of Autonomous
Moving Wheel Chair System using
EEG"

I strive to apply the co-creation education that transcends disciplines and cultures approach within a practical education in information technology in order to enhance students' creative thinking and accelerate students' conceiving and designing processes to explore new opportunities for more complex problem-solving in global settings.

CO-CREATION EDUCATION RELEVANT EXPERIENCE

Research Parts

Research on scenario creation for virtual verification of Advanced Driver Assistance Systems (ADAS) March 2019- present

Principal Investigator, Co-developed with Isuzu Motors Ltds. and my laboratory students. Using the automated driving simulator CARLA and the traffic flow visualization system OpenDataCam, we have been conducting research and development of a recognition system that enables multi-class, multi-tracking.

AI sensor system for Image and Voice Recognition to provide safety and security for citizens August 2019 - present

Principal Investigator, Research commissioned by Kanazawa City. Co-developed with my laboratory students.

We have developed an AI sensor (using Jetson Xavier) that can recognize images and sounds. We also conducted field experiments by placing them in several locations in Kanazawa.

Research on Techniques for Understanding the Full Extent of Cyber Attacks using Audit Logs August 2019 - March 2020

Principal Investigator, Co-developed with NTT R&D and my laboratory students. Using a log visualization tool, we analyzed how to trace attackers' traces in the audit logs using LSTM in Deep Learning technology.

Detecting Defective Parts using Image Recognition in Manufacturing Processes

August 2014- March 2016

Principal Investigator, Co-developed with Sugino Machine Ltd and my laboratory students. We developed a mechanism to recognize defective parts using multiple cameras in the manufacturing process of engine parts.

Education Parts

Future Creator Training School Project

March 2019- February 2020

AI Programming Manager, Research commissioned by Kanazawa City, Co-developed with my laboratory students.

We created teaching materials and conducted hands-on classes on AI-related programming for elementary to high school students.

Introduction of initiatives on biometric information including EEG

July 2019

Keynote Speech, Japan IBM-UG(user group) Conference 2019

I gave a keynote lecture (90 minutes) on biological information including EEG, which is one of the themes of Nakazawa Laboratory.

SRI International Workshop

2017 - present

Facilitator. Co-developed with Stanford Research Institute.

The program is conducted twice a year for students focusing on instruction on the principles for innovation creation to facilitate

CCNA(Cisco Certified Network Associate) Trainer

2015 - present

Trainer.

Practice building switches and routers for networks using CISCO equipment.

Japan and Mexico Global partner-ship training program

2011 - 2019

Overall program manager and in charge of IT education. Commissioned by JICA(Japan International Cooperation Agency)

It is a program that educates 6-8 students from Mexico every year for six months. I was in charge of supervising the students on campus and teaching them about IT.
